### International Society for Rock Mechanics and Rock Engineering

The International Society for Rock Mechanics and Rock Engineering (ISRM) was founded in Salzburg in 1962 as a result of the enlargement of the "Salzburger Kreis". Its foundation is mainly owed to Prof. Leopold Müller who acted as President of the Society until September 1966. The field of Rock Mechanics is taken to include all studies relative to the physical and mechanical behavior of rocks and rock masses and the applications of this knowledge for the better understanding of geological processes

and in the fields of Engineering. The ISRM is a non-profit scientific association supported by the fees of the members and grants that do not impair its free action. The Society has 5,000 members and 46 National Groups.
